Mark Array

Locate

How do you frame an event?

How are you to find the right location
when you are given the wrong directions?

Words on paper,
A map. A work opportunity.
A bridge to cross, a trail of change.

When I am making bridge
I don't think of the labor
I don't think about the money
Or how to make it into a thing.
My mind is a closed space.
Some people are afraid of bridges.

I am afraid of bridges too, but fuck you.

I want to participate
I want to participate in climate change
I want to be traffic.

Will I be here tomorrow
What remains of the sun

We have been seen.

Check social media.
A quiet slumber
A quick nap
A quiver
Another q word goes here.
