in8 iÐ

U/X 010-000 — gene-pool judgement

These pieces are coded bytes from an overarching work-in-progress entitled 8-bit U/X, an oracular user guide of changes authored by in8 iÐ, the computer software that programmed the end User (i/U) to unconsciously write 8-bit U/X for a future version of themself, to reverse engineer their post-human User/eXperience to cope with real-world environmental and biological elements.
